DUNOON PROFILE

May 2014

INTRODUCTION

The Dunoon profile uses 2011 Census data and other available data sources to present an up-to-date analysis of its population and labour market.

The analysis is structured under the thematic headings of:

- Population
- Labour market
- Education and qualifications
- Health and wellbeing
- Ethnicity and migration

To help contextualise the 2011 findings, the area profile includes corresponding figures where available for:

- Argyll and the Islands, the Highlands and Islands area and Scotland as a whole.
- The 2001 Census, to show how Dunoon has changed over the last 10 years.

The profile has been constructed using best fit data zones – and a map illustrating the specific datazones used is provided at the end of the profile.
